DETAILED OFFICE ACTION

Applicant's response filed on 19 August 2008 is acknowledged and entered.

Currently, claims 39-43 are pending and under consideration.

Withdrawal of Objections and Rejections:

The lack of enablement rejection of claims 39-43 under 35 U.S.C. 112, first paragraph is withdrawn for the reasons below (under "*Examiner's Comment*").

Examiner's Comment

The present claims 39-43 are directed to an antibody to the polypeptide of SEQ ID NO:290. The lack of enablement rejection of the claims under 35 U.S.C. 112, first paragraph, made in the last Office Action (mailed on 2/20/08) was based on if the claimed invention is to be used for therapeutic enhancement of the immune response, the results of Example 74 (MLR assay) in the specification are not sufficient to support the enablement of the claims since there is no indication of the statistical significance of the results, and no autologous controls; no correlation is provided to any particular *in vivo* function; there is no guidance to indicate that PRO335 could be used to any therapeutic effect for the treatment of diseases such as cancer or HIV.

However, the instant invention is directed to a product, not a method of treatment, and the product does not have a specifically designated use such as for treating a disease, therefore, it would not be required that the claimed antibody has to be enabled for therapeutic uses in order to meet the requirement of 35 U.S.C. 112, first paragraph, and it can be enabled for other uses. For example, the antibody can be used for a purpose such as purifying the polypeptide of SEQ ID NO:290. The technology of making an antibody to a known polypeptide, and purifying the polypeptide using the antibody has been well established in the art. Thus, one skilled in the art would know how to make and use the claimed invention. Therefore, the lack of enablement rejection of claims 39-43 under 35 U.S.C. 112, first paragraph is withdrawn.

Art Unit: 1646

Examiner's Amendment

The title of the application had been amended to clearly indicate the invention to which the allowed claims are directed. The new title is "Anti-PRO335 antibodies".

Conclusion:

Claims 39-43 are allowed.
